INDEX OF AUTHORS

Abelson, P. H., 709
Allanson, Virginia, 633
Auerbach, V. H., 443

Bacon, Harry E., 279
Barker, H. A., 11
Barkulis, Ingebjorg Lid, 103
Barnes, Frederick W., 643
Bartholomew, James W., 347
Belcher, M. Ruth, 579
Bennett, Rhona, 433
Billen, Daniel, 215
Bliss, Eleanor A., 61
Boroff, Daniel A., 387
Brandt, Carl D., 573
Braun, Werner, 291, 299
Bruner, D. W., 695
Budd, Vera, 257
Bunting, Henry, 114
Bunting, Mary I., 114
Burkhart, Blanche, 549
Burris, R. H., 313

Carlson, Warner W., 135, 143
Carroll, Marguerite D., 643
Carter, C. E., 317
Castellani, A. G., 633
Chang, Wei-shen, 33
Chapman, George H., 823
Cherry, William B., 601, 611
Christman, John F., 565
Clapper, William E., 261
Cleverdon, Robert C., 113, 523
Cochrane, Vincent W., 723
Cohen, Sidney, 783
Coleman, Marion B., 712
Colingsworth, D. R., 115
Cushing, John E., 433

Danz, Frances J., 367
Davison, Marjorie Moira, 717
Delwiche, Eugene A., 395
Derow, Matthew A., 717
Dimmick, Isabel, 723
Dodd, Matt C., 343
Doetsch, Raymond N., 113, 523
Douglas, H. C., 409
Duchow, Esther, 409
Dunlop, Stuart G., 457

Eagle, Harry, 475
Eaton, Monroe D., 73
Eble, T. E., 527
Edwards, P. R., 111
Ehrlich, H. L., 627
Elder, R. H., 351
Englesberg, Ellis, 171
Eny, Desire M., 269
Evans, E. Edward, 347
Ewing, William H., 497

Fisher, Kenneth C., 417
Fitting, Charlotte, 1
Frankel, Jack, 229
Friedberg, Felix, 151

Galton, Mildred M., 545
Gardner, Mary Virginia, 407
Garson, Warfield, 115
Gest, Howard, 239
Gordon, Ruth E., 327
Gots, Joseph S., 585
Graessle, Otto, 229
Gray, David H., 675
Groupé, Vincent, 23

Hanson, F. R., 527
Hartsell, S. E., 731
Heatherman, Mary E., 261
Héden, Carl-Göran, 153
Helmboldt, Charles F., 573
Herbst, Edward J., 379
Hermann, G. J., 111
Holtman, D. Frank, 307
Huang, Chi-to, 73
Hutchinson, W. G., 89
Hutton, William E., 463

Jeter, Wayburn S., 429
Johnson, Frank H., 675
Johnson, Marvin J., 361, 701
Jones, W. Grover, 307

Kamen, Martin D., 239
Kelner, Albert, 511
Knox, W. E., 443
Koffler, H., 115
Kuhn, L. R., 270

Lahelle, O., 112
Leet, Merwin, 714
Lein, Joseph, 595

Lein, Patricia S., 595
Lichstein, Herman C., 215, 565, 579
Lindstrom, Eugene S., 313
Lipmann, Fritz, 547
Ludwig, Ernest H., 89

Maass, Eleanor A., 361
McCulloch, Ernest C., 161
McLean, Dorothy J., 417
McLeod, Charlotte, 115
Macri, Beatrice P., 387
Maculla, Esther S., 791
Madajewski, Dorothy S., 279
Marshak, Alfred, 549
Migaki, Hoyo, 161
Miller, Ruth E., 621
Moran, Alice B., 695
Morse, M. L., 317
Murray, R. G. E., 351
Musselman, Arlyne D., 475

Nielson, Eldon D., 347
Niven, C. F., Jr., 633
Norman, Margaret C., 270

Oginsky, Evelyn L., 747, 761
Oglesby, Glenda, 665
Olitsky, Peter K., 112

Paine, Thomas Fite, Jr., 547
Pasternak, Varsenig Z., 621
Pearson, W. N., 653
Pelczar, Michael J., Jr., 113, 523
Peterson, D. H., 115
Peterson, Merlin H., 701
Peterson, W. H., 33
Pintner, Irma J., 117
Pollard, Arthur L., 307
Pope, Hilda, 223
Powell, Mary E., 548

Rahn, Otto, 714
Rees, H. B., Jr., 823
Reid, J. Douglas, 777
Rhodes, R. A., 689
Richards, Oscar W., 453
Roberts, Irena Z., 709
Roberts, Richard B., 709, 710
Robinow, Carl F., 114
Rode, L. J., 665
Rowe, Robert J., 279
Rucker, Robert R., 659
Ryan, Francis J., 181, 191, 201

Sacks, L. E., 11
Sage, Dorothy N., 127
Sands, Margot, 710
Sarles, W. B., 531, 689
Savard, Kenneth, 117
Schade, Arthur L., 811
Schaefer, Werner B., 549
Schatz, Albert, 117
Scherp, Henry W., 1
Schneider, Lillian K., 181, 191, 201
Schuchardt, Lee F., 127
Schuhardt, V. T., 665
Schultz, Edwin W., 367
Schwartz, Martin, 433
Sevag, M. G., 585, 621
Shapiro, S. K., 531, 689
Shrigley, Edward W., 791
Sigurdsson, Björn, 271
Smith, Grant N., 803
Smith, Louis DeSpain, 407
Smith, Nathan R., 327
Smith, Patricia H., 747, 761
Smolelis, A. N., 731
Snell, Esmond E., 379
Spaulding, Earle H., 279
Spirtes, M., 443
Stanier, R. Y., 45, 171
Stuart, C. A., 545
Sugg, John Y., 399
Swanson, Ann L., 803

Tanner, F. W., Jr., 737
Tetrault, P. A., 115
Thiele, Elizabeth H., 127
Thompson, John H., Jr., 343
Todd, H. Patricia, 61
Tonhazy, N. E., 769
Tryggvadóttir, Anna G., 271
Tsuchida, Martha, 45

Umbreit, Wayne W., 747, 761, 769

Vanderlinde, Robert J., 257
Van Lanen, J. M., 737
Verwey, W. F., 127
Vojnovich, C., 737

Wagner, Robert R., 491
Waksman, Selman A., 229
Walker, Burnham S., 717
Watson, Dennis W., 601, 611, 627
Webb, Arthur H., 151

Wedberg, Stanley E., 573
Whiteside-Carlson, Virginia, 135, 143
Williams, O. B., 823
Williams, William J., 501
Wilson, P. W., 313
Worrel, Cecilia S., 803
Wyckoff, Ralph W. G., 153
Wynne, E. Staten, 429

Yager, Robert H., 112
Yegian, Diran, 257
Youmans, Ann Stewart, 247
Youmans, Guy P., 247

Zarudnaya, K., 443
Zinsser, Hans H., 501
ZoBell, Claude E., 463

INDEX OF SUBJECTS

Acid fuchsin methylene blue agar, 429
— production by *Leuconostoc*, 135, 143
— production by *Streptomyces* species, 723
Actinomycetaceae, serological study of, 89
Adaptation, simultaneous, in bacterial oxidation of tryptophan, 45
Adenylic acid, and aspartic acid deaminase, 565
Agar, *see* Medium
Agglutinating principle, in chorioallantoic fluid, 791
Agglutination tests of actinomycetes, 90
β-Alanine, from decarboxylation of aspartic acid by *Rhizobium trifolii*, 215
Alcohol, polyvinyl, and growth of *Corynebacterium diphtheriae*, 783
Allantoic fluid, and IBV of chickens, 23
Amino acids, and growth inhibition of tubercle bacilli, 223
— acids, in healthy *Chlorella* cells, 269
— acids, synthesis of, by *Escherichia coli*, 457
— acids, toxicity for brucellae, 665
p-Aminobenzoic acid, effect on dextran synthesis by *Leuconostoc*, 143
— acid, reversal of sulfonamide inhibition by, 73
Antibiotics, *in vivo* and *in vitro* comparisons of, 61
—, *see also antibiotics by name*
Antigen, Flexner dysentery, detoxification of, 643
Antigenic pattern of influenza virus, 399
Antigens, of *Shigella dysenteriae*, study of, 387
Antiphage agent, from *Aspergillus* species, 527
Antiserum, *Paracolobactrum intermedium*, 545
Ashbya gossypii, riboflavin production by, 737
Aspartic acid deaminase, coenzyme of, 565
— acid decarboxylase of *Rhizobium trifolii*, 215
Aspergillus species, antiphage agents from, 527
Assay method for lysozyme, 731
Athiorhodaceae, nitrogen fixation by, 313
—, photosynthetic properties of, 239
Aureomycin, compared with other agents, 61
Azur dyes, antagonism to sulfathiazole 585

Bacillus coagulans, growth of at high temperatures, 327
— *coagulans*, vitamin requirements of, 113
— *coagulans* Hammer, description of, 335
— *megatherium*, lysogenesis of, 627
— species, counterclockwise rotation in swarming of, 351
— *stearothermophilus* Donk, description of, 333
Bacteria, action of detergents on, 443
—, lactic acid, and discoloration of sausages, 633
—, methane-oxidizing, 463
Bacterial esterases, inhibition of by chloramphenicol, 803
— utilization of anionic surface-active agents, 823
— variation, and selective environments, 291, 299
Bacteriophage T4r, and vitamin B_{12}, 710
—, *see* Virus
Bethesda group of paracolon bacteria, 695
Biochemical mutants of *Escherichia coli*, 181, 191, 201
Biotin, and aspartic acid deaminase, 565
—, anti-, effect, and growth promotion, 579
—, factors affecting content of in yeasts, 33
Blaberus cranifer, controlled feeding of, 573
Brucella abortus, immune rabbit serum, 307
— *abortus*, selective serum factor affecting variation of, 291, 299
Brucellae, amino acids toxic for, 665
Butterfat, hydrolysis of, 701

Carbohydrates, inhibition of growth of *Eberthella typhosa* by, 103
Carbon dioxide, supplementary, for growth of *Neisseria meningitidis*, 1
— source, and growth of *Mycobacterium tuberculosis*, 549
— sources, and oxygen consumption in growth of *Serratia marcescens*, 417
C^{14} uptake from glycine by *Torula utilis*, 151

Cells, animal, and action of streptomycin, 769
Cheese, lactobacilli and micrococci isolated from, 701
Chickens, infectious bronchitis virus of, 23
—, lactobacilli in intestinal tract of, 689
—, normal, intestinal microorganisms of, 531
Chloramphenicol, *see* chloromycetin
Chlorella, amino acids in, 269
Chlorobacterium, nitrogen fixation by, 315
Chloromycetin, compared with other agents, 61
—, inhibition of bacterial esterases by, 803
Chorioallantoic fluid, agglutinating principle in, 791
Chromatium, nitrogen fixation by, 315
Chromatography, paper-partition, 307
Circulin, naming of, 115
— (Q-19), compared with other agents, 61
Clostridium perfringens in soil, 407
— *welchii*, type A, toxin, 491
Cobalt, and bacterial growth, 811
Coenzyme, of aspartic acid, serine, and threonine deaminases, 565
Coliform bacteria, and *Shigella dispar*, 497
Colon, effect of streptomycin and sulfathalidine on bacterial flora of, 279
Corynebacterium diphtheriae, formaldehyde-resistant, properties of, 343
— *diphtheriae*, growth of, and polyvinyl alcohol, 783

Death rate of bacteria and survivor curves, 161
Decarboxylase, aspartic acid, of *Rhizobium trifolii*, 215
Dental caries, and oral lactobacilli, 261
Detergents, anionic, bacterial utilization of, 823
—, cationic, action on bacteria and enzymes, 443
Dextran synthesis by *Leuconostoc*, 135, 143
Diphtheria bacilli, unusual, 712
Diplococcus pneumoniae, recovery of from penicillin, 475
DNP and tryptophan oxidation, 49
Dose-reduction principle, and photoreactivation, 511
Dysentery, Flexner, detoxification of antigen, 643

Eberthella typhosa, inhibition of growth of, by certain carbohydrates, 103
Electrolytes, effect of, on virus adsorption, 611
Electron microscopy, of heated bacteria, 153
Enterobacteriaceae, medium for, 429
Enzymatic patterns, adaptive, in bacterial oxidation of tryptophan, 45
Enzyme system, aspartic acid decarboxylase, 215
— systems, nitrate- and nitrite-reducing, 11
Enzymes, adaptive, induced by insoluble substrates, 714
—, bacterial, action of detergents on, 443
Escherichia coli, action of detergents on, 443
— *coli*, biochemical mutation and growth of, 181, 191, 201
— *coli*, effects of heating, 153
— *coli*, fibrinolysis in, 501
— *coli*, photoreactivation of ultraviolet-irradiated, 511
— *coli*, streptomycin-resistant and -dependent, and streptomycin, 761
— *coli*, synthesis of amino acids by, 457
— *coli*, synthesis of nucleic acids in cultures of, 317
Esterases, bacterial, inhibition of by chloramphenicol, 803

Fatty acids, unsaturated, required by *Neurospora*, 595
Fibrinolysis in gram-negative bacilli, 501
Fish, streptomycete and pseudomonad pathogenic to, 659
Flexner dysentery antigen, detoxification of, 643
Folic acid, effect on dextran synthesis by *Leuconostoc*, 143
Formaldehyde-resistant *Corynebacterium diphtheriae*, 343
Frantz medium, and *Neisseria meningitidis*, 1
Fungous contaminants of optical instruments, 453

Gelatinous variants of *Pseudomonas aeruginosa*, 367
Glucose, requirement of *Neisseria meningitidis* for, 1
Glycine, uptake of C^{14} from, by *Torula utilis*, 151

Gram-negative bacilli, fibrinolysis in, 501
Growth, and mutation of *Escherichia coli*, 181, 191, 201
—, bacterial, and cobalt, 811
—, "invisible," and mutation in *Pseudomonas fluorescens*, 171
— of *Staphylococcus aureus*, and bound penicillin, 361
— of tubercle bacilli, determination of rate of, 247

Heat, *see* Temperature
α- and β-Hemolytic streptococci, recovery of from penicillin, 475
Hemophilus parainfluenzae, nutritional requirements of, 379
— *pertussis*, simplified medium for growth of, 127
Hexokinase, yeast, inhibition of, 621
Histidine-independent mutants of *Escherichia coli*, 181, 191, 201
Histidineless mutants of *Escherichia coli*, 181, 191, 201
Homobiotin, antibiotin effect of, 579
Host-virus system of *Streptococcus lactis*, 601, 611
Hyaluronidase, staphylococcal, 717
Hydrogen, molecular, production of by *Rhodospirillum rubrum*, 239
— peroxide, and discolorations of sausages, 639
Hydrolysis of butterfat by lactobacilli and micrococci, 701
Hyphomicrobium vulgare and *Rhodomicrobium vannielii*, 414

Immunization with heat-killed *Mycobacterium paratuberculosis* in mineral oil, 271
— with *Shigella dysenteriae*, 387
Indole, and *Neurospora crassa*, 433
Infectious bronchitis virus of chickens, 23
Influenza virus, antigenic pattern and mouse virulence of, 399
Inositol phospholipids, and streptomycin, 547
Insects, controlled feeding of, 573
Intestinal lactobacilli of chickens, 689
— microflora of normal chickens, 531

Kynurenin and kynurenic acid as postulated intermediates in tryptophan oxidation, 53

Lactic acid bacteria, and discolorations of sausages, 633
Lactobacilli, and hydrolysis of butterfat, 701
—, in the intestinal tract of the chicken, 689
—, oral, and dental caries, 261
Lactobacillus leichmannii, and vitamin B_{12}, 709
Lecithinase activity of *Clostridium welchii* toxin, 491
Lecithovitellin (LV), 491
Leuconostoc, effect of PABA, folic acid, and sulfanilamide on dextran synthesis by, 143
—, vitamin requirements of, for dextran synthesis, 135
Linoleic acid, required by *Neurospora*, 595
Linolenic acid, required by *Neurospora*, 595
Luminous bacteria, nuclei and large bodies of, 675
Lymphogranuloma venereum, reversal of sulfonamide inhibition of, 73
Lysogenesis of *Bacillus megatherium*, 627
Lysozyme, determination of, 731

Marine sediments, methane-oxidizing bacteria in, 463
Medium, acid fuchsin methylene blue agar, for enteric bacteria, 429
—, and riboflavin production by *Ashbya gossypii*, 737
—, Bordet Gengou, 130
—, chemically defined, for *Neisseria meningitidis*, 1
—, for biotin content of yeasts, 34
—, for growth of *Mycobacterium tuberculosis*, 549
—, for human strains of pleuropneumonia-like organisms, 270
—, Ludlam's, and isolation of staphylococci that clot blood, 823
—, simplified, for growth of *Hemophilus pertussis*, 127
—, *Staphylococcus* no. 110, and staphylococci that clot blood, 823
—, synthetic, and growth of *Torulopsis* (*Cryptococcus*) *neoformans*, 777
—, synthetic, for growth of *Hemophilus parainfluenzae*, 379
—, synthetic, for hydrogen production by *Rhodospirillum rubrum*, 240

Methane-oxidizing bacteria in marine sediments, 463
Methanomonas methanica, 463
Methylene blue, antagonism to sulfathiazole, 585
Micrococci, and hydrolysis of butterfat, 701
Micrococcus lysodeikticus, and determination of lysozyme, 731
Microorganisms, intestinal, of normal chickens, 531
Mineral oil, immunization with *Mycobacterium paratuberculosis* in, 271
Mitochondria, and inhibition of bacterial esterases by chloramphenicol, 807
Molds, growth of, on optical instruments, 453
Mouse pneumonitis, reversal of sulfonamide inhibition of, 73
— test, for toxicity of Flexner dysentery antigen, 643
Mutation, and growth of *Pseudomonas fluorescens*, 171
—, biochemical, and growth of *Escherichia coli*, 181, 191, 201
—, ultraviolet-induced, 511
Mycobacterium paratuberculosis, in mineral oil, immunization with, 271
— *tuberculosis*, growth of, 549
— *tuberculosis*, inhibition of growth of, 223

Neisseria meningitidis, chemically defined medium for, 1
Neomycin, *in vivo* activity of, 229
Neurospora, requiring unsaturated fatty acids, 595
— *crassa*, and indole, 433
Nitrate and nitrite reduction, influence of oxygen on, 11
Nitrogen, formation of, by denitrifying bacteria, 11
— fixation by photosynthetic bacteria, 313
— fixation by *Rhodospirillum rubrum*, 242
— source, and growth of *Mycobacterium tuberculosis*, 549
— sources, and oxygen consumption in growth of *Serratia marcescens*, 417
Norbiotin, antibiotin effect of, 579
Norcardia erythropolis, decomposition of steroids by, 117
Nuclei and large bodies of luminous bacteria, 675
Nucleic acids, synthesis of in *Escherichia coli* cultures, 317
Nutritional requirements of *Hemophilus parainfluenzae*, 379

Oleic acid, required by *Neurospora*, 595
Optical instruments, fungous contaminants of, 453
Osmotic pressure, and nuclei of luminous bacteria, 675
Oxalacetate-pyruvate condensation, and action of streptomycin, 747, 761, 769
Oxidation, bacterial, of tryptophan, 45
Oxygen, influence of, on nitrate and nitrite reduction, 11
— consumption, and growth of *Serratia marcescens*, 417

Paper-partition chromatography, 307
p-Aminobenzoic acid, *see* Aminobenzoic acid
Paracolobactrum intermedium antiserum, 545
Paracolon bacteria, Bethesda group, 695
Penicillin, bound, and growth of *Staphylococcus aureus*, 361
—, recovery of bacteria from toxic effects of, 475
— G and O, compared with other agents, 61
Petri dishes, simple method for sealing, 548
pH, and histidine mutants of *Escherichia coli*, 181, 191, 201
— of medium, effect on lysis of cells, 603
Phenylalanine analogues and growth of tubercle bacilli, 223
Phosphorus, radioactive isotope of, as indicator of nucleic acid synthesis, 319
— metabolism of *Lactobacillus leichmannii*, and vitamin B_{12}, 709
Photobacterium fischeri, a purine-requiring strain, 653
Photoheterotrophic bacterium, *Rhodomicrobium vannielii*, 409
Photoreactivation of ultraviolet-irradiated *Escherichia coli*, 511
Photosynthetic bacteria, metabolism of, 239
— bacteria, nitrogen fixation by, 313
Pleuropneumonialike organisms, medium for, 270
Pneumococcus, antagonism to sulfathiazole in respiration of, 585
Poliomyelitis virus, cultivation of, 112
Polymyxin B and D, compared with other agents, 61
Polypeptin, naming of, 115

Polyvinyl alcohol, and growth of *Corynebacterium diphtheriae*, 783
Precipitin tests of actinomycetes, 90
Propionibacterium, vitamin requirements of, 395
Protein carboxyl groups, and staining of bacterial cells, 347
— of *Torula utilis*, uptake of C^{14} into, 151
Proteus vulgaris, growth of, and cobalt, 811
Protoplasm, bacterial, staining of, 347
Pseudomonad, pathogenic to fish, 659
Pseudomonas aeruginosa, gelatinous variants of, 367
— *denitrificans*, nitrogen production of, 13
— *fluorescens*, relationship of growth and mutation of, 171
Purines, required by *Photobacterium fischeri*, 653
Pyruvate, *see* Oxalacetate-Pyruvate condensation

Rabbits, protection of, with *Shigella dysenteriae*, 387
Rhamnose, inhibition of *Eberthella typhosa* growth by, 103
Rhizobium trifolii, aspartic acid decarboxylase of, 215
Rhodomicrobium vannielii, 409
Rhodospirillum rubrum, nitrogen fixation by, 313
— *rubrum*, photosynthetic properties of, 239
Riboflavin, antagonism to sulfathiazole, 585
—, production of, by *Ashbya gossypii*, 737
Rotation, counterclockwise, in swarming of *Bacillus* species, 351

Salmonella colorado, a new type, 111
— *corvallis*, a new type, 111
Salt concentration, and nuclei of luminous bacteria, 675
Sausages, discoloration of, and lactic acid bacteria, 633
Screening, *Paracolobactrum intermedium* antiserum for, 545
Selective environments, and bacterial variation, 291, 299
Serine deaminase, coenzyme of, 565
Serratia marcescens, elaboration of pigment and polysaccharide of, 114
— *marcescens*, growth of, and oxygen consumption, 417
Serum, normal rabbit, (NRS), 493
—, rabbit, normal and *Brucella*-immune, 307
—, rabbit immune, inhibition of hexokinase by, 621
— factor, selective, affecting *Brucella abortus*, 291, 299
Shigella dispar, and coliform bacteria, 497
— *dysenteriae*, toxins and antigens of, 387
Soil, *Clostridium perfringens* in, 407
— microorganisms, decomposition of steroids by, 117
Sorbitan monooleate, and growth of *Mycobacterium tuberculosis*, 549
Staining, effect of esterification of protein carboxyl groups on, 347
—, effect of heating bacteria for, 153
—, of *Serratia marcescens*, 114
Staphylococcal hyaluronidase, 717
Staphylococci, blood-clotting, 823
Staphylococcus albus, recovery of, from penicillin, 475
— *aureus*, and agglutinating principle in chorioallantoic fluid, 791
— *aureus*, and staphylococcal hyaluronidase, 717
— *aureus*, growth of, and bound penicillin, 361
— *aureus*, recovery of, from penicillin, 475
Stenothermophilic aerobic sporogenous bacilli, vitamin requirements of, 523
Stereoisomerism, and tryptophan oxidation, 48
Steroids, decomposition of, by soil microorganisms, 117
Streptococcus faecalis, recovery of, from penicillin, 475
— *lactis*, host-virus system of, 601, 611
Streptomyces species, metabolism of, 723
Streptomycetaceae, serological study of, 89
Streptomycete, pathogenic to fish, 659
Streptomycin, action of, 747, 761, 769
—, and inositol phospholipids, 547
—, compared with neomycin, 229
—, compared with other agents, 61
—, effect on colon bacterial flora, 279
— -dependent tubercle bacilli, isolation of, 257
Streptothricin, compared with neomycin, 229
Substrates, insoluble, and adaptive enzymes, 714
Succinic acid, formation of, in metabolism of *Streptomyces* species, 723

Sugars, raw, effect on dextran synthesis by *Leuconostoc*, 139, 144
Sulfadiazine, and PABA, 73
Sulfanilamide, and PABA, 73
—, effect on dextran synthesis by *Leuconostoc*, 143
Sulfathalidine, effect on colon bacterial flora, 279
Sulfathiazole, methylene blue and riboflavin antagonism to, 585
Sulfonamide inhibition, reversal of, by PABA, 73
Surface-active agents, anionic, bacterial utilization of, 823
—— -active agents, survivor curves of bacteria exposed to, 161
Swarming of *Bacillus* species, counterclockwise rotation in, 251
Synthetic medium, *see* Medium, synthetic

Temperature, and growth of aerobic spore-forming bacteria, 327
—, and nuclei of luminous bacteria, 675
—, and oxygen consumption of *Serratia marcescens*, 417
—, effect of on allantoic fluid infected with IBV of chickens, 28
—, effect of on bacterial nucleus, 153
Thiamine, and growth of *Torulopsis* (*Cryptococcus*) *neoformans*, 777
Threonine deaminase, coenzyme of, 565
Throat cultures, unusual diphtheria bacilli from, 712
Tissue homogenates, and action of streptomycin, 709
Torula utilis, uptake of C^{14} from glycine, 151
Toxicity of Flexner dysentery antigen, 643
Toxin, *Clostridium welchii* type A, 491
Toxins, of *Shigella dysenteriae*, 387
Tryptophan, bacterial oxidation of, 45
Tubercle bacilli, determination of growth rate of, 247
— bacilli, growth inhibition of, by analogues of phenylalanine, 223
— bacilli, streptomycin-dependent, isolation of, 257
Tween 80, *see* Sorbitan monooleate

Ultraviolet-irradiated *Escherichia coli*, photoreactivation of, 511
Urethane, and nuclei of luminous bacteria, 675

Virus, infectious bronchitis, of chickens, 23
—, influenza, antigenic pattern and mouse virulence of, 399
—, poliomyelitis, cultivation of, 112
—, *Streptococcus lactis*, growth characteristics of, 611
—, *Streptococcus lactis*, measurement of, 601
Viruses, lymphogranuloma venereum and mouse pneumonitis, reversal of sulfonamide inhibition of, by PABA, 73
Vitamin B complex, and growth of *Torulopsis* (*Cryptococcus*) *neoformans*, 777
— B_{12}, and bacteriophage T4r, 710
— B_{12}, and phosphorus metabolism of *Lactobacillus leichmannii*, 709
— requirements of *Bacillus coagulans*, 113
— requirements of *Leuconostoc* for dextran synthesis, 135
— requirements of *Propionibacterium*, 395
— requirements of stenothermophilic aerobic sporogenous bacilli, 523

Yeast hexokinase, inhibition of, by homologous antiserum, 621
Yeasts, antibiotin effect against, 579
—, factors affecting biotin content of, 33
